Cumulative Author Index, Volume VII, JBC&R

A

Abston, Sally, MD, 404, 488, 508, 532
Achauer, Bruce M., MD, 313
Alexander, J. Wesley, MD, SCD, 130, 309
Austgen, W., FPO, 253
Austin, Ellen V., RN, BSN, 33

B

Baldemor, G., RN, 426
Banes, Albert J., PhD, 96
Berkebile, Brenda L., BS, 411
Bevin, A. G., MD, 96
Black, Kirby S., PE, 313
Blumenfield, Michael, MD, 328
Bonds, E., MA, 488, 508
Bornhoeft, John, PhD, 96
Bressler, Victoria, RN, BS, 313
Brimm, J. E., MD, 86
Brooks, Jill, MS, CCC, 42
Brown, Barbara, RN, MSCN, 247
Brown, Roger, CPT, AMSC, 144
Browne, Gina, RN, PhD, 247
Burtscher, Manfred, 59
Bush, J. W., MD, 86
Byrne, Carolyn, RN, MHSc, 247

C

Carlow, Deborah L., OT, 257
Carroll, W., RN, 253
Carter, Edward A., PhD, 469, 475
Chodil, J. J., PhD, 426
Christensen, M. A., RN, BS, 122
Christofferson, George, PhD, 382
Cline, C. W., MD, 230
Cole, Melvin, MD, 532
Collins, Judy, OTR, 426
Compton, David W., DMD, 96
Cox, Karen, RN, 351
Cram, A. E., MD, 409
Crawford, C. M., RPT, 323
Cronan, Thomas, PT, 54

D

Davies, J. W. L., DSc, 213
Davis, Maureen, RN, 426
Demling, Robert, MD, 15, 277
Desai, Manu H., MD, 404, 488, 508, 532
Doherty, Daniel, RN, 33
Dominioni, L., MD, 130
Dotson, Claudette H., RN, BSN, 105

E

Eland, Joann M., RN, MA, PhD, 105

F

Fader, Pat Buddingh, OTR, 431
Fader, Robert C., 241
Falk, R. E., MD, FRCS (C), 112
Feldman, Marc, MD, 244
Foresman, Pamela A., BA, 398
Fox, Charles L., Jr, MD, 422
Fox, Paul, MD, 422

G

Gaisford, J. C., MD, 230
Gelfant, Ben, MD, 257
Givens, Ann, OTR, 431
Goldfarb, I. William, MD, 230, 244, 385, 411
Gottlieb, L. J., MD, 35, 234
Gordon, Mary, RN, MS, 266, 351, 426
Gresch, J. J., RN, BS, CEN, 122
Gunning, Tom, MD, 492

Yamaguchi, Kent T., MD, 484

Z

Zachary, L. S., MD, 35
Zawacki, B. E., MD, 138

Cumulative Subject/Title Index, Volume VII, JBC&R

1.0 Anesthesia

2.0 Antiinfectives

3.0 Antimicrobial

Comparative study of hand cleansers used in hospitals: In vitro antimicrobial activity against *Staphylococcus aureus, Pseudomonas aeruginosa,* and *Candida albicans,* 241

Method to determine antibacterial activity of silver sulfadiazine creams, 382

Norfloxacin and silver-norfloxacin antimicrobial agents: Results of in vitro susceptibility testing against bacteria and *Candida* sp. isolated from burn patients, 479

Silver sulfadiazine-impregnated biological membranes as burn wound covers, 422

Synergism, antagonism, topical antimicrobial combinations: An in vitro analysis, 238

4.0 Biologic Dressings

Biologic, biosynthetic and synthetic dressings as temporary wound covers: A biochemical comparison, 96

Silver sulfadiazine-impregnated biological membranes as burn wound covers, 422

5.0 Body Systems Alterations

Thermal injury and gastrointestinal function

I: Small intestinal nutrient absorption and DNA synthesis, 469

II: Evidence for the production of hepatic dysfunction in the rat following acute burn injury, 475

Use of naloxone in septic shock: A case report and review of current literature, 122

6.0 Burn Shock

Effect of microvascular hydrostatic pressure and local prostanoid production on early and late postburn edema formation, 15

Plasma exchange for failure of early resuscitation in thermal injuries, 230

A simulation analysis of plasma water dynamics and treatment in acute burn resuscitation, 86

7.0 Burn Team

Nonverbal communication: Role of the speech pathologist on the burn team, 42

Roles and functions of occupational therapy in burn care delivery, 431

8.0 Burn Wounds, Closure, Coverage

Burn depth evaluation with fluorometry: Is it really definitive?, 313

Influence of membrane dressings on wound contraction, 398

Round table discussion: Temporary wound closure after burn excision, 138

9.0 Chemical Burns

Chemical burns, 404

Chemical burns: Retrospective review, 343

Toxic chemicals versus lung tissue—an aspect of inhalation injury revisited, 213

Treatment of experimental hydrofluoric acid burns, 35

10.0 Clinical Management

Chemical burns, 404

Cold injury: A collective review, 331

Full-thickness skin grafting for contact burns of the palm in children, 501

Fungal sepsis: An increasing problem in major thermal injuries, 488

Laser doppler flowmetry for the early detection of hypertrophic burn scars, 496

Patient classification systems in burn care, 511

Is tracheostomy warranted in the burn patient? Indications and complications, 492

Vascular access through the femoral vessels: Indications and complications, 498

11.0 Debridement

12.0 Devices

Arm hammock for elevation of the thermally injured upper extremity, 144

Head splint for immobilization of the neck postgrafting, 257

An improved bed canopy, 59
Improved surgical care of posterior burns and donor sites using air-fluidized support, 40
A leg support for circumferential exposure of donor sites, 146
Nonverbal communication: Role of the speech pathologist on the burn team, 42
Postoperative splinting of the lower face and neck, 148
The triple-component neck splint, 357
Use of the Dynasplint to correct elbow flexion burn contracture: A case report, 151

13.0 Economics
Cost containment/cost reduction: The economic impact of burn DRGs, 417
Patient classification systems in burn care, 511
Potential DRG reimbursement vs actual cost for burn care
I. Patients with burns of less than 25% TBSA, 45
II. Referral distance, 48

14.0 Education
Maintaining quality: Our present challenge—1986 presidential address to The American Burn Association, 223

15.0 Electrical Burns
Long-term disability following high-voltage electrical hand injuries, 526
Posttraumatic stress disorder in electric burn patients, 521

16.0 Emergency Care

17.0 Endocrinology

18.0 Epidemiology
Chemical burns: Retrospective review, 343
Gasoline explosions, gasoline sniffing: An epidemic in young adolescents, 532

19.0 Etiologic Agents
Toxic chemicals versus lung tissue—an aspect of inhalation injury revisited, 213
Treatment of experimental hydrofluoric acid burns, 35

20.0 Excision/Grafting
Effective management of cultured epithelial cells—two case reports, 33
Excisional therapy of facial burns, 24
The optimal time for excision of scald burns in toddlers, 508

21.0 Hematology

22.0 Infection
Effect of burn injury on the kinetics of in vivo polymorphonuclear neutrophil (PMN) chemotaxis to *Staphylococcus aureus,* 465
Fungal sepsis: An increasing problem in major thermal injuries, 488
Pseudomonas maltophilia: An unusual burn wound pathogen, 409

23.0 Immunology
Lymphoproliferative response to phytohemagglutinin in the burn patient—no paradigm in vitro, 112
Progress in the characterization of an immunosuppressive glycopeptide (SAP) from patients with major thermal injuries, 388

24.0 Nursing
Pain on the burn unit: Patient vs nurse perceptions, 413

25.0 Nutrition
Comparison of continuous and intermittent tube feedings in burned animals, 130
Thermal injury and gastrointestinal function I: Small intestinal nutrient absorption of DNA synthesis, 469

26.0 Pain
Pain on the burn unit: Patient vs nurse perceptions, 413

27.0 Pediatrics
A coordinated approach to the discharge of burned children, 127
Facial resurfacing in the pediatric burn patient: A comparison of scar excision with dermabrasion, 29
Full-thickness skin grafting for contact burns of the palm in children, 501
The management of burned children in a general hospital burn unit, 244
The optimal time for excision of scald burns in toddlers, 508
Synchronized ventilatory support as a therapeutic means of reducing hypercarbia in a pediatric burn unit, 109

28.0 Pharmacology
The effect of high-dose cimetidine on pulmonary extravascular water after acute smoke injury, 484
Failure of topical steroids and vitamin E to reduce postoperative scar formation following reconstructive surgery, 309
Use of naloxone in septic shock: A case report and review of current literature, 122

29.0 Post Mortem Exam

30.0 Prevention
The development of a program for juvenile fire offenders, 253
An effective burn prevention program initiated by a recovered burn patient group, 535
Gasoline explosions, gasoline sniffing: An epidemic in young adolescents, 532

31.0 Psychiatry

32.0 Psychology

33.0 Psychosocial Aspects
Burned and battered adults, 529
Camp Celebrate: A therapeutic weekend camping program for pediatric burn patients, 434
A coordinated approach to the discharge of burned children, 127
Perception of sleep following burn injury, 105
Posttraumatic stress disorder in electric burn patients, 521
The social competence of children following burn injury: A study of resilience, 247
A typology of spousal response to the crisis of severe burn, 328

34.0 Reconstruction
Facial resurfacing in the pediatric burn patient: A comparison of scar excision with dermabrasion, 29
Free flaps in selected burn patients, 385
Full-thickness skin grafting for contact burns of the palm in children, 501
The radial forearm flap in burn reconstruction, 318
The use of tissue expansion techniques in burn reconstruction, 234

35.0 Rehabilitation
Camp Celebrate: A therapeutic weekend camping program for pediatric burn patients, 434
A coordinated approach to the discharge of burned children, 127
Effects of immobilization and mobilization on cartilaginous, bony, and soft-tissue structure: Review of the literature, 54
Failure of topical steroids and vitamin E to reduce postoperative scar formation following reconstructive surgery, 309
Head splint for immobilization of the neck postgrafting, 257
Heterotopic ossification: Are range of motion exercises contraindicated?, 323
Long-term disability following high-voltage electrical hand injuries, 526
Postoperative splinting of the lower face and neck, 148
The triple-component neck splint, 357
Use of the Dynasplint to correct elbow flexion burn contracture: A case report, 151

36.0 Respiration
The effect of high-dose cimetidine on pulmonary extravascular water after acute smoke injury, 484
Is tracheostomy warranted in the burn patient? Indications and complications, 492
Postgraduate course: Respiratory injury
I. Incidence, mortality, pathogenesis and treatment of pulmonary injury, 184
II. A synopsis of respiratory function, 191
Production of chemotactic factors and lung cell changes following smoke inhalation in a sheep model, 117
Synchronized ventilatory support as a therapeutic means of reducing hypercarbia in a pediatric burn unit, 109
Use of the fiberoptic bronchoscope to change endotracheal tubes in patients with burned airways: Case report, 348

37.0 Review Articles
Chemical burns, 404
Chemical burns: retrospective review, 343
Cold injury: A collective review, 331
Progress in the characterization of an immunosuppressive glycopeptide (SAP) from patients with major thermal injuries, 388

38.0 Secondary Complications
Is tracheostomy warranted in the burn patient? Indications and complications, 492
Laser doppler flowmetry for the early detection of hypertrophic burn scars, 496
Vascular access through the femoral vessels: Indications and complications, 498

39.0 Sequelae

40.0 Severity, Morbidity, Mortality
Chemical burns: Retrospective review, 343
Comparison of burn size estimates between prehospital reports and burn center evaluations, 411
Treatment of experimental hydrofluoric acid burns, 35
